

Accessing UL-WiFi on your personal device

To connect your personal device to ULUSD WiFi, you must be an active employee or student (with authorization). This WiFi authentication system is for personal cell phones, laptops, etc. District devices are automatically joined to the Internet, and do NOT need to follow these instructions.

You can join this WiFi (on your non-ULUSD devices):

- **Apple (iOS) instructions**

- Find the **UL-WiFi** network, and join with your email address and provided password (sent to your email inbox).
 - --> This is a unique password for WiFi, NOT your district Google password. Please [submit an IT ticket](#) if you have any trouble finding that password.
- "Accept" the "untrusted" certificate to complete the connection.
- Done!

- **Android instructions**

- Find the **UL-WiFi** network, and join with your email address and provided password (sent to your email inbox).
 - --> This is a unique password for WiFi, NOT your district Google password. Please [submit an IT ticket](#) if you have any trouble finding that password.
- If asked for a certificate, choose the "no certificate" option, or "don't validate".
- Enter your email address in the "Identity" field, and your provided password.
